Curated MCP integration status

Audit of all 88 entries in the October 2026 curated shortlist | 9 November 2026

Integrated means a catalog exists on the checked upstream/main snapshot. On this branch means a catalog file has been brought into codex/curated-vendor-mcps. These labels do not mean the MCP has been published or live-tested with credentials.

Status counts: Integrated: 33 | On this branch: 10 | Excluded: 30 | Deferred: 12 | Verification pending: 3

Docs

#	MCP	Status	How / why
1	Notion	Integrated	Notion catalog; vendor OAuth.
2	Atlassian Rovo (Confluence)	Integrated	Confluence catalog using Atlassian remote MCP.
3	mcp-atlassian (sooperset)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
4	Confluence (aashari)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
5	Google Docs & Drive (a-bonus)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
6	Google Workspace (taylorwilsdon	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
7	Microsoft 365 (Softeria)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
8	Coda (orellazri)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
9	Guru	Integrated	Guru catalog; remote sign-in.
10	Box	On this branch	Box catalog copied from the separate vendor-agent branch; remote vendor endpoint.
11	Egnyte	Integrated	Egnyte catalog; remote sign-in.
12	Airtable	Integrated	Airtable catalog; remote sign-in.
13	Obsidian (cyanheads)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
14	Readwise	Integrated	Readwise catalog; remote sign-in.
15	Craft	Deferred	Customer-specific deployment or endpoint; current catalog requires one fixed service URL.
16	Mem	Verification pending	Official Mem-hosted endpoint reported; verify live tool list, access and logo before catalog.

Meeting notes

#	MCP	Status	How / why
17	Fireflies	Integrated	Fireflies catalog; remote sign-in.
18	Granola	Integrated	Granola catalog; remote sign-in.
19	Otter.ai	Integrated	Otter catalog; remote sign-in.
20	Fathom	Integrated	Fathom catalog; remote sign-in.
21	Grain	Integrated	Grain catalog; remote sign-in.
22	tl;dv	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
23	Circleback	Integrated	Circleback catalog; remote sign-in.
24	Fellow	On this branch	Fellow read-only meeting catalog; vendor OAuth and admin enablement.

#	MCP	Status	How / why
25	Krisp	Integrated	Krisp catalog; remote sign-in.
26	Zoom	On this branch	Zoom catalog copied from the separate vendor-agent branch; remote vendor endpoint.
27	Fireflies (Props-Labs)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
28	Zoom Transcript (forayconsulting	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
29	GranolaMCP (pedramamini)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.

Ticketing

#	MCP	Status	How / why
30	Linear	Integrated	Linear catalog; read-only remote MCP.
31	Atlassian MCP (Jira)	Integrated	Jira is covered by the existing catalog.
32	GitHub MCP	Integrated	GitHub is covered by the existing catalog.
33	Asana	Integrated	Asana catalog; remote sign-in.
34	ClickUp	Integrated	ClickUp catalog; remote sign-in.
35	monday.com	Integrated	monday.com catalog; remote sign-in.
36	Trello	Integrated	Trello catalog; remote sign-in.
37	Plane	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
38	GitLab	Integrated	GitLab catalog; remote sign-in.
39	Sentry	Integrated	Sentry catalog; remote sign-in.
40	Jira (aashari)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
41	ClickUp (taazkareem)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
42	Zendesk (reminia)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
43	Freshdesk (effytech)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.

CRM

#	MCP	Status	How / why
44	Salesforce	On this branch	Salesforce read-only catalog included from the Salesforce branch.
45	Salesforce DX MCP	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
46	HubSpot	Integrated	HubSpot catalog; remote sign-in.
47	Attio	Integrated	Attio catalog; remote sign-in.
48	Close	Integrated	Close catalog; remote sign-in.
49	Intercom	Integrated	Intercom catalog; remote sign-in.
50	Zoho MCP	Deferred	Zoho MCP requires the customer to build a server; no ready-made fixed CRM endpoint.
51	Clarify	On this branch	Clarify read-only CRM catalog; official endpoint and OAuth.
52	Day AI	On this branch	Day AI read-only CRM catalog; official fixed endpoint and OAuth. Paid agent tier required.

#	MCP	Status	How / why
53	Outreach	On this branch	Outreach read-only sales catalog; OAuth; vendor Amplify access may be required.
54	Attio (kesslerio)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
55	Pipedrive (CData)	Excluded	CData wrapper is third-party and local, not a Pipedrive-hosted MCP.

Databases

#	MCP	Status	How / why
56	Databricks (databrickslabs)	Deferred	Databricks Labs project is experimental/deprecated; managed endpoint is workspace-specific.
57	Databricks (RafaelCartenet)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
58	Snowflake Cortex AI (Snowflake- Labs	Deferred	Snowflake Labs local server is deprecated; managed endpoint is account-specific.
59	Snowflake (isaacwasserman)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
60	Google Cloud BigQuery	Integrated	BigQuery catalog; Google-hosted MCP.
61	MCP Toolbox for Databases	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
62	BigQuery (LucasHild)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
63	Supabase	Integrated	Supabase catalog; remote sign-in.
64	Neon	Integrated	Neon catalog; remote sign-in.
65	Postgres MCP Pro (crystaldba)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
66	PlanetScale	Integrated	PlanetScale Insights catalog.
67	MongoDB	On this branch	MongoDB Atlas catalog copied from the separate vendor-agent branch.
68	ClickHouse	On this branch	ClickHouse catalog copied from the separate vendor-agent branch.
69	Redis	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
70	MotherDuck / DuckDB	On this branch	MotherDuck read-only hosted catalog included; PDF listed an older local setup.
71	Prisma	Deferred	Customer-specific deployment or endpoint; current catalog requires one fixed service URL.
72	Elasticsearch	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
73	DBHub (bytebase)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.

Analytics

#	MCP	Status	How / why
74	PostHog	Integrated	PostHog catalog; remote sign-in.
75	Mixpanel	Integrated	Mixpanel catalog; remote sign-in.
76	Amplitude	Integrated	Amplitude catalog; remote sign-in.
77	Pendo	Deferred	Pendo uses distinct regional MCP endpoints; region selection is not represented by the fixed-URL catalog.
78	Contentsquare (incl. Heap parent)	Deferred	Contentsquare exposes the MCP URL in each customer's in-app guide; no universal endpoint verified.

#	MCP	Status	How / why
79	Hex	Deferred	Hex has a shared US endpoint, but EU and dedicated tenants use different URLs; defer universal listing.
80	Omni Analytics	Deferred	Omni directs users to their instance-specific MCP URL; no universal endpoint verified.
81	Metabase	Deferred	Customer-specific deployment or endpoint; current catalog requires one fixed service URL.
82	dbt	Deferred	Customer-specific deployment or endpoint; current catalog requires one fixed service URL.
83	Tinybird	Deferred	Customer-specific deployment or endpoint; current catalog requires one fixed service URL.
84	Grafana	Verification pending	Grafana Cloud has a fixed vendor-hosted OAuth MCP; verify tools and read-only permissions before catalog. Self-hosted Grafana needs a bridge.
85	Similarweb	Verification pending	Fixed vendor endpoint and API key documented; exact MCP tool identifiers need a live authenticated probe.
86	Google Analytics (QuerySail) Vendor (QuerySail)Remote Google OAuth R only Hosted GA4 reports link	Excluded	QuerySail is a third-party hosted wrapper, not a Google-hosted MCP.
87	Google Analytics (codechap)	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.
88	Google Search Console (AminForou	Excluded	Customer/local server or third-party wrapper; no fixed original-vendor hosted endpoint.

Self-hosted and managed-source onboarding

A marketplace entry is possible only after its connection path exists and has been verified. These are recommendations, not integrated agents.

Source	Hosting	Route	Setup requirement
Grafana Cloud	Vendor-hosted	Direct candidate	Fixed OAuth 2.1 endpoint. Verify read-only tools and live OAuth flow before catalog.
Snowflake	Vendor-managed	URL wizard first	Account-specific MCP URL, OAuth setup and role grants; no shared URL.
Databricks	Vendor-managed	URL wizard first	Workspace-specific URL; require read-only SQL policy and tool probe.
PostgreSQL	Customer-hosted	Bridge pilot	Private DB plus reviewed read-only adapter; archived reference server is not production hosting.
Files / private docs	Local/private	Bridge pilot	Explicit folder allowlist and read-only filesystem server.
Jira Data Center	Customer-hosted	Bridge pilot	Private Jira adapter; existing Jira Cloud integration is separate.
MySQL / SQLite / Redis	Customer-hosted	Later bridge	Assess each database adapter, identity and read-only policy.
GitHub Enterprise / private wikis / internal APIs	Customer-hosted	Later bridge	Customer-specific URL and permissions; reviewed adapters needed.
Prometheus / private Grafana / private Sentry	Customer-hosted	Later bridge	Network-local observability endpoints; constrain tool access.
Playwright / Chrome DevTools / arbitrary MCPs	Local / unreviewed	Defer	Broad side effects and tool surfaces need separate sandbox policy.

Connection order

1. Verify Grafana Cloud for a direct catalog. 2. Build per-connection vendor URL onboarding for Snowflake and Databricks. 3. Pilot the outbound-only bridge with PostgreSQL, then local files and Jira Data Center. 4. Expand adapters only after the pilot is supportable.

No customer source credential should be requested in Slack. Private-source credentials remain customer-side; writes are disabled until separately approved.

Verification notes

The source PDF is a directory snapshot, not a live vendor specification. Remote and official claims require current first-party confirmation before publication.

Tenant-specific vendor MCPs are deferred because the current catalog has one fixed service.url. No fabricated shared endpoint is used.
